## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 30days ~~MONTH(S)~~ FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a non-washing rice manufacture apparatus, classified in class 99, subclass 516.
- II. Claims 10 and 11, drawn to a non-washing rice manufacture method, classified in class 426, subclass 507.

The inventions are distinct, each from the other because:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of Group II as claimed can be practiced without the specifics of the Group I apparatus such as a pressure rice washing means having a plurality of water injection means, a helical projecting rib, a centrifugal dehydrating tube provided with a porous peripheral wall, a screw tube inside the centrifugal dehydrating tube coaxially with the centrifugal dehydrating tube, a screw blade for moving axially polished rice discharged from the rice discharge port, a rinse water discharge port for discharging rinse water toward the polished rice moved by the screw blade, a moisture adjustment means comprises a net, a suction blower for sucking air from under the net, an angle adjustment means for setting the pressure rice washing means to a desired

inclination angle, a wind generating blade rotating integrally with the centrifugal dehydrating tube, etc.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication from the examiner should be directed to Examiner George C. Yeung whose telephone number is (571) 272-1412. The examiner can generally be reached on Monday-Friday from 10:30 a.m. to 7:00 p.m..
